

**An Andean-Brazilian Security Agenda.
Concepts, Actors, Discussions**

Adrián Bonilla
FLACSO, Ecuador

The text tries to point out the issues of an agenda on security for the Andean countries and Brazil and it discusses its legitimacy. The paper proposes to make a first approach to the "securitization" processes in the region in order to imagine the possibility of building up a security complex in the Northern South America, alternative to the one focussed by the U.S. Foreign Policy.
